Furniture That Fits

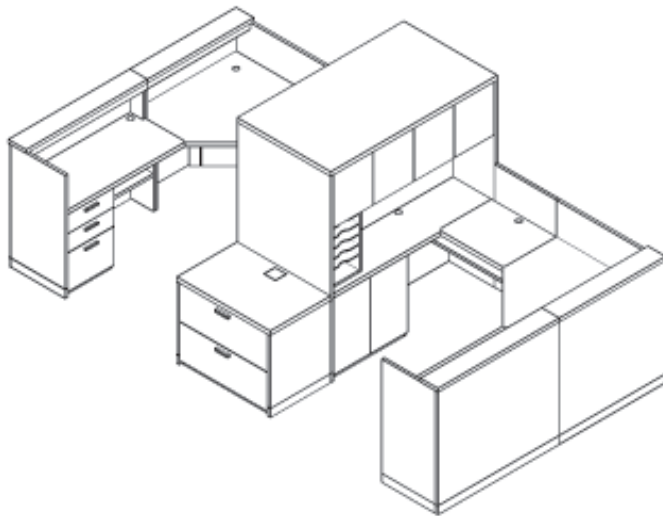

What's New ... A Double U Station

Summer 2005

Double U Station ... As Specified

We at Custom Desk often partner with the end user's architect/design team for high performance solutions. Evident here are the quality and special details that hallmark production from Custom Desk.

Note: legal width filing pedestal, foot/personal item shelves, electrical and data port access grommets with concealed wire management, black granite reception surface, and message tack board with concealed lighting - all in a custom finish.

This mirror imaged double workstation includes several work surfaces in a client specific storage organization.

Prestige, professionalism and quality of service are all attributes called out by the 1 ½" thick work surfaces, rich finish color, refined edge profile and baseline reveal. This legal firm's high performance work environment had functional constraints, however, because of the tight footprint the design team specified. Custom Desk has a record of success answering these creative challenges.

Particular needs and a customized solution are addressed by this pull-out catalog shelving with swing away bifold door - making tight access easy.

The Custom Desk Double U Workstation captured within was based on our Executive Series, with our Vision edge profile, and several client selected options, both standard (e.g., baseline reveal) and custom (e.g., bifold door). The Executive Series includes the following standard specifications and choices:

- Work surfaces/crowns 1.5" thick
- Profiles - Eased, Bevel, or Radius w/optional black side reveals
- Four side Horizontal profiling
- Outside 1" leg
- Modesty panel - recessed full panel with interior shelf
- 3 Standard hardware styles
- 4 species wood veneers
- 14 stains with catalyzed lacquer finish
